OCEAN SET STATION AS PAYABLE

DOCUMENT VERSION: 1.00

SETTING STATION AS PAYABLE

In the document you will find short tutorial how to set up station as payable.

Go to Assets module, Locations and click on the "Charge points" button.

Points of Interest					
Charge point owners Configuration changes					

Once on the charge point layer click on the "Edit" button in the top right corner.

Charge point Locatoro: / Avtobusna postaja Ivančna Gorica / SI*GREGO127-01			
Add Global region	(CD Show proc	First Move to another location	Delete View location Online data

Locate EVSE settings and enable the check mark "Payment required".

EVSEs Create new EVSE		
1 2		
		Copy EVSE
EVSE charging type	DC	Ŧ
Friendly code	SI*GRE00127-01- 1	
External code		
Protocol EVSE code	1	
Min current	6	А
Max current	375	A
Output voltage	400	Volts
Max power	150	kW
Parking lot number		
Reserved parking for EV		
Payment required		
Remote start enabled		
Parking sensor installed		
Included in power management calculations		
Cable locking		

This will define EVSE as payable, which means that from now on you can define one EVSE as free and other one as payable (e.g. AC EVSE free and DC EVSE payable).

At the moment you still need to fill in the "Supported authentications and payments" in order to define station as payable, but this will not be necessary in future.

Supported authentications and payments					
	•		• Add		
Payment type		Authentication			
Contract (subscription)		NFC RFID	Delete		

After saving the settings, Charge point and its EVSEs are now set as payable. In order to apply the tariffs to the station you will still need to click on the button "Manually update prices" in the module Billing & payment, Tarrifs. This will change with one of the future Ocean releases and when it happens, we will let you know.
